

Mosquito bite prevention starts with you.

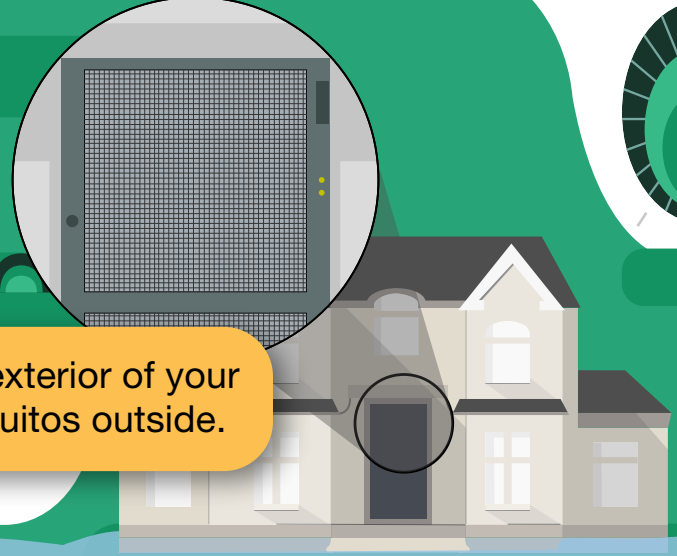

Mosquitoes can spread Zika virus and other diseases. Zika is linked to birth defects. Take these steps to fight the bite!

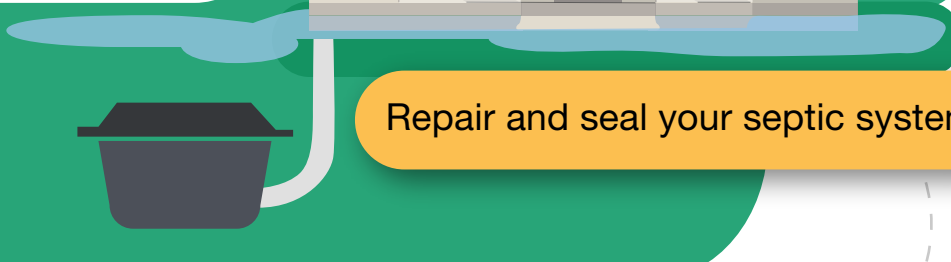

Eliminate standing water inside and outside your home.

Use an EPA-registered insect repellent.
www.epa.gov/insect-repellents

Use screens on the exterior of your home to keep mosquitos outside.

Repair and seal your septic system.

Wear protective clothing.

Work together to eliminate standing water and reduce mosquito populations.

Protect yourself, your family, and your community which will... protect her pregnancy.
